

#contents valuation

in case of divorce or death

Easily, smartly and quickly assess household effects for a wide audience, that is our mission. We are an independent property valuation agency with three independent appraisers of movable property (rg.) And supply household effects in the Netherlands and Belgium. From 2005 we are the specialist for recognized inventory assessments based on the DIA algorithm (Daily Value through Indexing and Depreciation). The daily value is valued by correcting the indexed new value with the assessed depreciation.

Determine the reference date yourself and request an extensive inventory assessment report in which your entire household is valued at that daily value. Our inventory assessments are transparent, recorded in writing and supported by official up-to-date index figures. The appraisal report is therefore also accepted by all authorities.
